A lot of reasons to smile

Full Digital. Same Day Immediate Loading
A Straumann ProArch Course

Madrid 21\textsuperscript{th} and 22\textsuperscript{th} of February 2019
Learning objectives

Treating fully edentulous patients has always been challenging yet modern dental implant solutions, such as Straumann Pro Arch, provide clinicians with a simplified and reliable way to address the challenge.

Straumann Pro Arch is focused on treatment of fully edentulous patients using fixed restorations and immediate loading protocols. The solution has been designed to address patient specific needs, including their expectations, different clinical and anatomic situations, as well as their financial resources.

Course overview

The purpose of the course is to share with participants deep theoretical knowledge and practical experience in treatment of fully edentulous patients using Straumann Pro Arch surgical and prosthetic protocols.

The extensive usage of full digital workflow and same day immediate loading performed under strict conditions and intensively practiced at the i2 Clinic creates a new implant dentistry focused on individual patients and their needs.

During the course, participants will learn step-by-step indications, patient selection, advanced diagnosis, and surgical and prosthetic treatment with a complete digital workflow. The proprietary treatment protocol designed at i2 Clinic that takes advantage of the full digital workflow, including the intraoral scanner, will be used in live surgeries and taught to the participants.

Course topics

1. How to select and diagnose a fully edentulous patient under the ProArch concept.
2. Surgical technique.
3. ProArch same day immediate loading solutions.
4. The use of the TRIOS intraoral scanner in Pro Arch cases, temporaries and definitive prosthesis.
5. The Pro Arch prosthetic treatment: same day PMMA full arch design and production.
6. All the adds-on while on treatment.
7. Communication with the lab on a full digital workflow.
2. The surgery with special focus on the full digital approach starting with the intraoral scanner.
3. The immediate full digital arch, same day rehabilitation. Design, production and placement.
4. The final full arch full digital bridge.
5. The technology: TRIOS intraoral scanner, software, CAD software, milling, printing.

The course is offered to dentists, maxillofacial surgeons and both are more than welcome to invite their dental technicians.

Upon request, a special parallel program focused on dental technicians can be offered by Dr. Arturo Godoy.
DR. LUIS CUADRADO
- MD
- DMD
- Plastic, reconstructive and esthetic Surgeon
- Director of Clinical Training Center i2 Implantologia, Madrid
- Director of Postgraduate Training Program in Implantology UDIMA University. Madrid.
- Member of AO, EAO, SEI, SECIB, SECPRE, ITI
- Over 200 courses and conferences, national and international
- More than 100 scientific articles
- Practice in oral implantology, extraoral and reconstructive surgery

DR. ARTURO GODOY
- DMD
- CDT
- Zirkonzhan KOL
- IVOCLAR Vivadent KOL

DRA. CRISTINA CUADRADO
- Degree in Dentistry from the European University of Madrid
- Master in Advanced Oral Implantology by the European University of Madrid
- Co-author of several articles on Implant Dentistry, Prosthodontics and Oral Surgery
- Oral Communication at the Third Congress of Implantology EMU-NYU
- Professor, University degree in Implantology Clinic. University UDIMA

DRA. ANDREA SÁNCHEZ
- Degree in dentistry by Universidad del Zulia, Venezuela.
- University degree in Implantology Clinic. UDIMA
- TRIOS 3 and Design Studio specialist by 3Shape and i2 Implantología.
- Sales department, support technician and trainer in GO3D

FÉLIX DE SANTOS
- Director Santos Labodent SL
- Director FS Dental Lab SXXL
- Dental Tecnician
- Dental Design - Exocad
DAY 1

09:00 - 09:10  Welcome
09:10 - 10:00  The ProArch concept.
               A brief introduction to patient selection and indications
               Differences classic/Digital workflow
10:00 - 11:30  Case presentation
               Live surgery 1: Implant placement, scanning
11:00 - 11:30  Live design of the temporary bridge. Start of PMMA milling
11:30 - 12:00  Coffee break
12:00 - 14:00  Surgical technique with ProArch and i2 full digital
               ProArch: Step by step different full digital workflows in non-guided surgery
14:00 - 15:00  Lunch break
15:00 - 17:00  The artistry of full digital implantology: Temporaries and final ProArch
17:00 - 17:30  Case 1 prostheses delivery
17:30 - 18:00  Coffee break
18:00 - 19:00  Live cases presentation with final prostheses
19:00 - 20:00  The i2 guided protocols, step by step
21:00        Group Dinner

DAY 2

09.00 - 10:30  Case 2 presentation
               Live surgery 2
11:30 - 12:00  Coffee break
12:00 - 13:00  The classic ProArch step by step. Surgery and Prosthetics
13:00 - 14:00  The intraoral scanning different set ups: implants, Natural tooth, Milling, Printing
14:00 - 15:00  Lunch Break
15:00 - 17:00  Hands on session with Straumann implants guided and non guided
               Hands on session with intraoral Scanner
Price
2000€ dentists, OMX surgeons and lab technicians

How to book your place
Send an email to cursos@i2-implantologia.com
or call to (0034) 915624464
Contact your Straumann Representative

Dates
Thursday 21st of February from 9.00 to 20.00
Friday 22nd of February from 9.00 to 17.00

Address
i2 Implantologia Learning Center
Calle Nuñez de Balboa, 88
Zip Code 28006 Madrid (Spain)
